

Fostering Innovation with 4IND

AI Video Analysis Solution Provider

COMPANY BROCHURE | 4IND Co., Ltd

LEADING THE WORLD'S IT BUSINESS

4IND is a solution provider founded by experts to become a leading company in the 4th industry (an industry that makes factories and products intelligent through software).

AI Video Surveillance

Our deep learning-based intelligent control solutions guarantee smarter safety and security.

AI Video Inspection

Our compact, integrated deep learning-based inspection module solves vision inspection problems.

COMPANY OVERVIEW

Company name	4IND Co., Ltd.
Incorporated	2017. 02. 02
Industry (products)	Software and hardware development (smart city application software)
Head Office	Room 320, Mobile Convergence Technology Center, 350-27 Gumi-daero, Gumi-si, Gyeongsangbuk-do
R&D Center	Room 316, Mobile Convergence Technology Center, 350-27 Gumi-daero, Gumi-si, Gyeongsangbuk-do
Factory	Room 409, GERI National Industrial Support Center, 17, Cheomdangieop1-ro, Sandong-eup, Gumi-si, Gyeongsangbuk-do, Republic of Korea
Contact	+82) 54-456-3401
Website	http://www.4ind.co.kr

LEADING THE WORLD'S IT BUSINESS

4IND leads innovations in the AI industry

Our goal is to provide customers with new experiences through continuous research and development and to help your business grow.

COMPANY INFORMATION

History and Organizational Chart

2017

- 02** • 4IND incorporated
- 04** • Behavior recognition-based AIM (AI Marketer) SaaS developed: NIPA
- 06** • Selected to support startup package for video processing based marketing solutions: Establishment of s GERI dedicated research department
- 11** • AI Marketer, which applied for a patent for artificial intelligence based behavior recognition, was certified as a cloud service
- 12** • AI Marketer trademark applied and software registered

2018

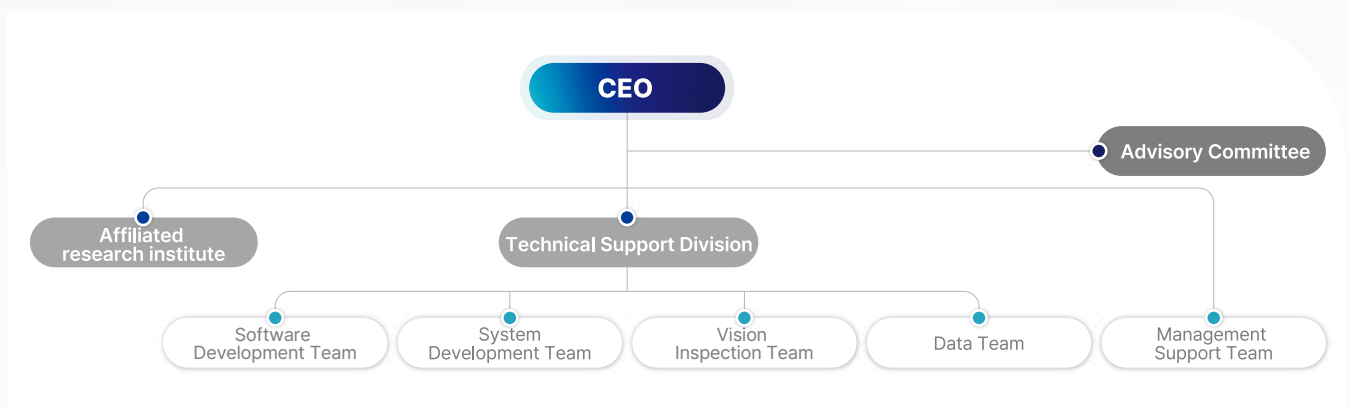

- 04** • Selected as a regional software convergence project support project: NIPA
- 06** • Startup growth technology development project (selected as an innovative R&D task): Patent application AI-based automatic detection of fire/arson by the Ministry of SMEs and Startups
- 07** • Selected as a global-level R&D technology development project for Gyeongbuk Software Convergence Cluster: Pohang TP
- 09** • Participated in ICT Convergence Expo Exhibition: EXCO
- 10** • Participated in the Global Security Asia in Singapore
 - Patent application for behavior detection system and method using deep learning from video input from camera
 - BOM AI software registered as an asset
 - Confirmed as a venture company: Korea Technology Finance Corporation
- 11** • Participated in the 2018 China Hi-Tech Fair in Shenzhen, China
- 12** • Patent application for fast artificial intelligence image generation method using meta-learned generative adversarial network
 - Machine vision monitoring solution for smart factories registered as a software asset
 - ICT/Software Excellent Company Award from Gyeongsangbuk-do

2021

- 02** • Management of people entering unmanned stores, joint research with ETRI (facial recognition, door opening and closing, etc.) Solution (BOM-Entrance) service started
- 04** • Tracking based on object identification based on artificial intelligence analysis (multiple cameras, re-recognition) Solution development and demonstration (NIPA, Daegu Suseong Alpha City)
- 05** • Intelligent identification and tracking demonstration supplied to Korea Expressway Corporation
- 10** • WSCE (Smart City) Excellent Company Award under the tech & solution category
- 12** • Received Daegu-Gyeongbuk Startup Excellence Award (Daegu-Gyeongbuk Small and Medium Business Administration Director Award)

2022

- 01** • Joint research with ETRI
- 02** • Worksite worker safety control solution (BOM-Safety) service started
- 04** • Registered as AI solution service (fire/smoke detection, etc.) business partner for NTT DOCOMO Selected as an AI voucher supplier (NIPA)
- 06** • Selected as a contractor to develop a digital elevator integrated control platform by Korea Elevator Safety Agency
- 10** • GS certification level 1
 - Traffic flow analysis and violation detection system exported to Indonesia
 - Attracted investment from ETRI
- 11** • Won the contract to develop an intelligent air-to-surface gunnery analysis model from the Air Force Headquarters
- 12** • Received the Gumi Mayor's Startup Venture Excellence Award from the Gyeongbuk Creative Economy Innovation Center

2019

- 02 · Office expansion
- 03 · Participated in information and communications and broadcasting research and development and standard development support projects to develop BOM Traffic, a traffic analysis solution, in 2019.
- 06 · Corporate affiliated research institute (AI Lab)
- 12 · Excellent Company Award in the Gyeongbuk ICT/software field at the Gyeongbuk Startup Innovation Awards

2020

- 02 · Selected as one of the 14th G-STAR Dreamers by Gyeongbuk Creative Economy Innovation Center
- 03 · Registered as an information and communication construction business
- 04 · Selected for the artificial intelligence identification and tracking (facial recognition, abnormal behavior) system demonstration and development project (Ministry of Justice, NIPA, Incheon Airport)
- 06 · Intelligent CCTV certification (only company in Gyeongsangbuk-do)
- 07 · ISO9001 certified
- 08 · Innobiz certified
- 09 · Certified as a leading learning-centered field training company. Selected as a 2020 Gyeongsangbuk-do 4th Industrial Revolution core technology development project
- 11 · Selected as a company allowed for special cases on military service (skilled industrial personnel)

2023

- 03 · Selected as a research institute company (Innopolis Foundation)
- 04 · Selected as a strong domestic company for export vouchers
 - Selected as one of the top 100 companies in materials, parts, and equipment
- 05 · Selected as a small hidden champion by the Ministry of Employment and Labor. Selected as an excellent company by the Ministry of Science and ICT's ICT Fund Project
- 09 · KC Agency (National Radio Research Agency)
- 10 · New factory registered
 - Room 409, Domestic Production Support Center, 17, Cheomdangieop1-ro, Sandong-eup, Gumi-si, Gyeongsangbuk-do, Republic of Korea
- Selected as a TIPS (tech incubator program for startup) project
- Value chain R&BD project selected as a national project
- 11 · 4 overseas MOUs signed

2024

- 01 · Signed an overseas agency agreement with Indonesia
 - Selected as an ETRI project
- 02 · Gumi Special Zone Special Zone Innovative Company Award
- 03 · Selected for Korea Railroad Corporation's CCTV-based intelligent train surveillance system development project

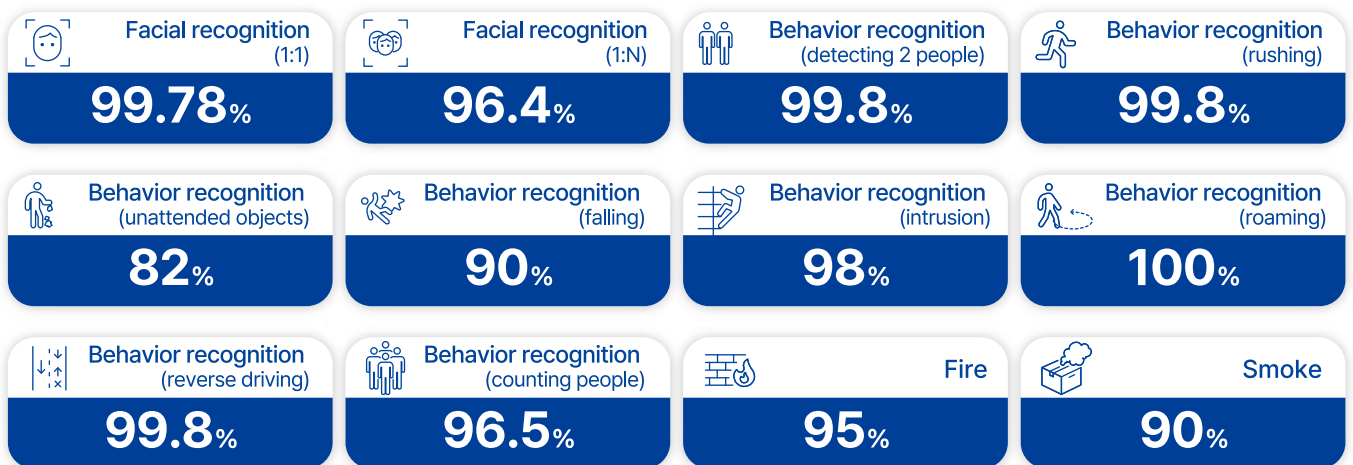

Implement customized services suitable for customers' business environments

We provide the best solutions with customized systems for diverse needs.

✓ Superior recognition rate

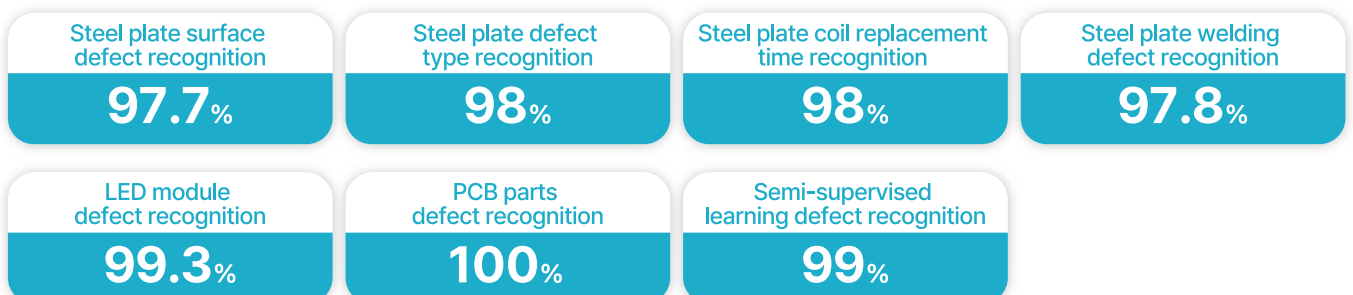

BOM PLATFORM

*KISA Intelligent CCTV certified. International KOLAS test report-based

BOM INSPECTION

*International KOLAS test report-based

✓ We have many intelligent technologies

* International KOLAS test report, Korea Internet & Security Agency intelligent certification, and many more

Research institute company registration certificate

BOM EDGE BASIC Conformity registration certificate

Certificate of recognition for corporate research institute

100 materials, parts and devices startup business

Intelligent CCTV certification

Patent certificate

Trademark registration certificate

Surveillance solutions for Smart city

BOM PLATFORM

AI-based video analysis integrated control platform

SMART CITY

4IND BUSINESS AREA

SMART CITY

Through our AI-based video analysis technology, we provide solutions that form the core of smart cities, including urban security, traffic control, and access management for unmanned stores.

- Create a specialized 4IND DNA (data, network, and AI) to develop solutions and services needed for smart cities
- Create a data collection system using 5G, CCTVs, drones, robots, etc.
- Collect data from overseas partners
- Acquire data accumulation, processing/combining capabilities · Utilize data and create AI innovation services
- 4IND is the first company to benefit from Korea's public data provision system (Ministry of Justice, National Police Agency, etc.)

BOM TRAFFIC

Traffic law violation detection & traffic analysis solution

BOM INSPECTION

AI-based defect inspection solution

BOM MOM

Integrated manufacturing and operations management solution

SMART
FACTORY

4IND
포인드(주)
BUSINESS
AREA

SMART FACTORY

The unstructured image interpretation and high detection accuracy, thanks to our AI based machine vision technology, provide solutions that dramatically improve productivity in smart factories.

- Utilize various technologies such as machine vision algorithms to create an optimal deep learning model
- Provides optimal analysis and predictive maintenance features through 4IND's proprietary deep learning model and GPU computing technology.
- Provides continuous performance improvement through inspection result reporting and result analysis

LEADING THE WORLD'S IT BUSINESS

PRODUCTS AND SERVICES

4IND deploys new technologies for a competitive edge in technology to develop the best solutions to provide creative and innovative products and services.

We are pioneering the **age of smart technology** with artificial intelligence

Intelligent integrated control solution

BOM PLATFORM

Be Smart, Be Safe with our 3rd Generation Solutions

BOM Platform is a next-generation intelligent CCTV control solution that detects objects and analyzes events based on artificial intelligence, enabling more accurate and faster video analysis.

INTEGRATION PLATFORM

Web-based integration dashboard,
Supports various AI-based video surveillance such as traffic analysis, access control, etc.

- ✓ Up to 32 channels monitoring, selective video surveillance
- ✓ Real-time event notifications (web, SMS, Messenger, etc.)
- ✓ Integrate with existing CCTV, NVR, VMS
- ✓ Setting detection events for per CCTV

12

PRODUCT DIFFERENTIATION

Based on integrated platform,
Manage all CCTVs from the same location

Provide customized services, thanks to the general-purpose APIs, allowing integration with third-party solutions and data sharing

Activate only the necessary features for each camera **For reasonable cost and system operating cost reduction**

Based on the cloud computing technology, people can **Conveniently use our solutions in diverse environments, including PCs, mobile phones, and tablets**

AI-based vision inspection solution

BOM INSPECTION

A vision quality management platform that allows users to control manufacturing process quality from remote locations thanks to intelligent vision and integrated control technology

BOM Inspection is an AI-based vision inspection solution that inspects external defects in manufactured and produced products. It provides exceptionally superior detection accuracy compared to existing rule-based vision inspection methods, and thanks to semi automatic learning, it can be applied to manufacturing sites quickly and rapidly on multiple items and derived models to ensure stabilization of quality. In addition, it provides innovation in quality management based on refined data and statistics through advanced cloud-based manufacturing operation management (MOM) rather than a simple vision inspection method.

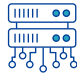

MAIN FEATURES

Vision Inspection	Data Management	Self-learning	Integrated Control
<ul style="list-style-type: none"> Real-time product inspection Defect history management Integrating PLC, MES, and ERP Event alerts 	<ul style="list-style-type: none"> Automatic labeling Data analysis Data collection Data transfer 	<ul style="list-style-type: none"> Data augmentation Setting learning options Building learning datasets Remote model updating 	<ul style="list-style-type: none"> Remote site control Production statistics monitoring Monitoring server usage Customizable dashboard

DETECTED DEFECTS

Surface Defect Inspection	PCB Inspection	Micro Defect Inspection	Measurement	Injection product inspection
 <p>Black dot / white dot</p>	 <p>Wrong component</p>	 <p>Crack</p>	 <p>Dimension Measurement</p>	 <p>Deformation</p>
 <p>Scratch</p>	 <p>Missing component</p>	 <p>Bonding Wire Defect</p>	 <p>Angle Measurement</p>	 <p>Crack</p>
 <p>unpainted</p>	 <p>Reverse component</p>	 <p>Foreign matter</p>	 <p>Position Measurement</p>	 <p>Missing component</p>

WHAT MAKES OUR PRODUCTS DIFFERENT

				
Integrated control <ul style="list-style-type: none"> Monitor and manage multiple production lines in one place 	Integrated dashboard <ul style="list-style-type: none"> Monitoring production information by process 	Integrated data management <ul style="list-style-type: none"> Integrated management of defect data by process 	AI vision inspection technology <ul style="list-style-type: none"> Able to inspect diverse products and defects 	AI model learning feature <ul style="list-style-type: none"> Reduce maintenance costs with AI model training and remote updates

A variety of hardware to meet customer needs

HARDWARE SPEC

With a variety of hardware, including NPU-based edge devices and GPU-based workstations and servers, we can propose hardware suitable for customers' purposes for use and required volume.

BOM KIOSK FD & FDS

▲ BOM KIOSK FD

NPU-based Edge Device for face recognition
 This device is perfect for small units such as unmanned stores, access control, and offices. The FDS is equipped with a scanner to validate ID cards.

- Customers can choose between wall-mounted and stands available (optional)
- ID recognition scanner installation (optional)

Number of supported channels

1ch

NPU computation

6Tops

Touch display

10.1 Inch

BOM KIOSK FDS ►

BOM EDGE PREMIUM

NPU-based Edge Device for high-performance AI computation
 It is a high-spec device designed for multi-purpose use in hospitals, nursing homes, elevators, and multi-channel CCTVs.

- Add an NPU accelerator (optional)

Number of supported channels

4ch

NPU computation

6Tops or higher

Touch display

13.3 Inch

Product name	BOM KIOSK FD	BOM KIOSK FDS	BOM Edge Premium
Number of supported channels	1ch	1ch	4ch
Computation types	NPU	NPU	NPU
Screen size	10.1 inches	10.1 inches	13.3 inches
CPU	Rockchip RK3588	Rockchip RK3588	Rockchip RK3588
GPU	-	-	-
